A TEMPLATE FOR FOUNDERS

[life is beta]

Lior Pozin · CEO & Co-Founder of AutoDS

How to use this template

01 Everything in sand is yours

Every [bracketed placeholder] in this sand color gets replaced with your data. Everything in dark gray stays - it's the structure that works.

02 Work in order

The 9 sections are sequenced to earn a buyer's trust before showing numbers. Keep the order.

03 Open the speaker notes

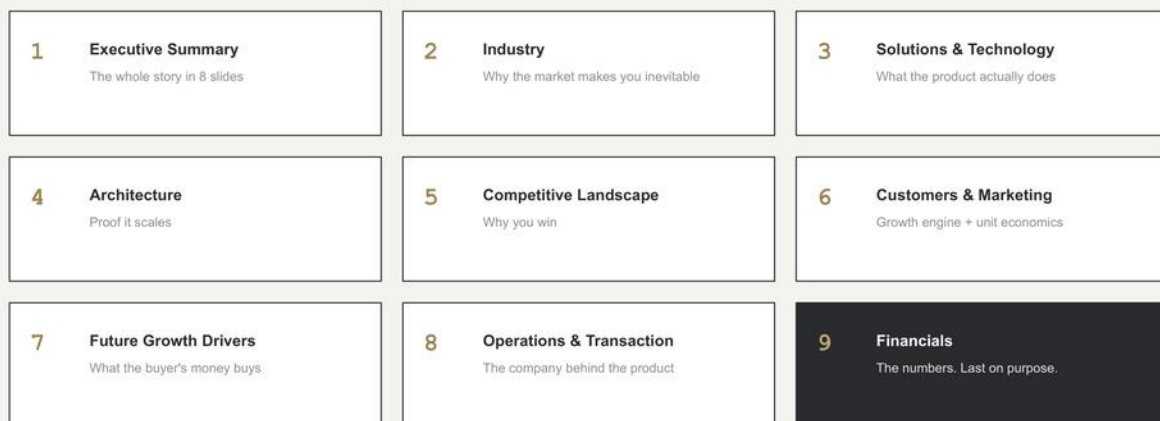

Every slide carries notes: what to fill in, and why the slide is built this way. The notes are the playbook.

04 Cut what you can't defend

A slide you can't back up in diligence is worse than no slide. If you don't have the number yet, that gap is your homework.

THE PROMISE This structure took a bootstrapped company from first conversation to a signed acquisition. The numbers were ours. The structure is yours.

The 9-section spine

Financials come last. The first eight sections earn the right to show them.
