

THE EXIT DECK TEMPLATE

The slide-by-slide structure of the presentation that sold AutoDS.
Fill in your numbers. Get buyer-ready.

Read me first

- This deck is the SANITIZED template of the original sale presentation. Every real number, name, and data point was replaced with a [PLACEHOLDER].
- The original PDF must never be shared, screenshotted, shown on camera, or referenced visually. Only this template ships as the lead magnet.
- Two slides are marked INTERNAL: this one and the hard-rules slide at the end. Delete both from the public version.
- Approved public wrapper facts for promo copy: sold to Fiverr, the \$92M exit, bootstrapped, founder-owned, two co-founders, built from Lior's own eBay automation.
- If team size comes up in promo copy, the approved public number is 250 employees.

[!]

Template only.
Never the real deck.
Never the real numbers.

How to use this template

One page of orientation before you build.

01 Work in order

The 9 sections are sequenced to earn the buyer's trust before showing numbers. Keep the order.

02 Replace every [PLACEHOLDER]

Each slide lists exactly what to fill in. If you don't have a number yet, that gap is your homework.

03 Keep the commentary

Every chart in the original carried a plain-language note on how the metric is calculated. Buyers distrust charts with hidden methodology.

04 Cut what you can't defend

A slide you can't back up in diligence is worse than no slide. Conservative and consistent beats impressive.

The 9-section spine

Buyers read in this order. Every section earns the next one.

Company at-a-Glance

One slide, four quadrants. A buyer understands the whole business in 60 seconds.

SLIDE LAYOUT

FILL IN

- Overview: 4-5 bullets. What you do, who you serve, your unfair positioning with the biggest platform in your space.
- Key stats: [TEAM SIZE] · [OWNERSHIP: founder-owned, bootstrapped] · [REVENUE MODEL + % SPLIT] · [ACTIVE PAYING CUSTOMERS]
- [TAM TODAY / TAM IN 5 YEARS] · [REVIEW RATING + COUNT] · [HQ + REMOTE FOOTPRINT]
- Growth chart: revenue + profit bars, last 2 actual years plus current-year estimate.
- Unit economics teaser: your single best repeatable-economics chart.

WHY IT WORKS

60 seconds to the whole business. Everything after this slide is proof.

Investment Highlights

7 numbered reasons to buy. One line each, the proof baked into the sentence.

FILL IN

- 1 — Market position: leader in a [SIZE] market with secular tailwinds
- 2 — Product: automates the entire [WORKFLOW] end to end
- 3 — Unit economics: [PAYBACK] CAC payback, consistent cohorts
- 4 — Tech: scalable platform, multi-channel by design
- 5 — Financial profile: [GROWTH %] growth at [MARGIN %] margins
- 6 — Team: founders committed to the next chapter
- 7 — GTM: low-touch engine driven by [TOP CHANNEL]

SLIDE LAYOUT

7

WHY IT WORKS

Odd number, claim + proof per line. This is the slide buyers copy into their investment memo.

The Ecosystem

One diagram: you in the middle, everyone around you better off.

FILL IN

- Left: your supply side [SUPPLIERS / PARTNERS / DATA SOURCES]
- Right: the platforms you plug into [PLATFORM LOGOS]
- Center: your product as the connecting layer
- Below: your customer and THEIR end customer
- Two benefit columns: what your customer gets, what their customer gets

SLIDE LAYOUT

WHY IT WORKS

Buyers pay more for businesses that improve every player's outcome, not just their own.

Customer Evolution

Prove you serve customers across their whole lifecycle, not one niche.

FILL IN

- [BEGINNER SEGMENT] — profile + your value proposition
- [PART-TIME SEGMENT] — profile + your value proposition
- [FULL-TIME / PRO SEGMENT] — profile + your value proposition
- [ADJACENT SEGMENT] — the segment that expands your TAM
- For each: 2-3 lines on who they are, 2-3 lines on what you do for them

SLIDE LAYOUT

WHY IT WORKS

A customer who grows inside your product is retention the buyer doesn't have to build.

The Company Journey

A timeline that makes the buyer feel the arc.

FILL IN

- 6-7 milestones from [FOUNDING YEAR] to today
- Milestone 1: the founder falls in love with the problem, BEFORE the company exists
- Middle: launch, rebuild, key integrations, inflection point
- Final milestone: 'the future' — poised for growth with a new partner
- One line of story under each milestone

SLIDE LAYOUT

WHY IT WORKS

The real deck started the story before the company existed. Buyers buy founders who lived the problem.

Financial Profile Summary

The bridge from story to money.

FILL IN

- Revenue + EBITDA bars: [YEAR-2 A] · [YEAR-1 A] · [THIS YEAR E] · [NEXT YEAR P]
- Growth strategy boxes: [PRODUCT DEV] · [CHANNEL DEPTH] · [NEW SEGMENT]
- [MARKETING EXPANSION] · [CONVERSION + RETENTION] · [ADJACENT OFFERINGS]
- 3-4 bullets on the near-term plan in plain sentences

SLIDE LAYOUT

WHY IT WORKS

Projections next to named strategies. Every forecast dollar traces to a lever on this slide.

Management Team

Founders only, or founders plus 1-2 key executives.

FILL IN

- [FOUNDER 1]: years of relevant experience, prior roles, elite credentials
- [FOUNDER 2]: same structure, 3-4 bullets max
- One line: 'Supported by a full team committed to the next chapter'
- Skip: hobbies, adjectives, mission statements

SLIDE LAYOUT

WHY IT WORKS

Credibility bullets only. The buyer is underwriting the people as much as the product.

The Market Shift

Tell the market's story in two eras. Make your category feel inevitable.

FILL IN

- THEN: 3 bullets on why it was hard [CLUNKY / EXPENSIVE / COMPLEX]
- NOW: 4 checkmarks on why it exploded [ACCESSIBLE / FAST / MASSIVE AUDIENCE]
- Anchor stats: [MARKET SIZE THEN] vs [MARKET SIZE NOW], each with a named source
- 1-2 key themes that make your category the obvious next step

SLIDE LAYOUT

WHY IT WORKS

A buyer needs to believe the market did the hard work already. You're the way to ride it.

Market Size

One big chart. Third-party sources only on this slide.

FILL IN

- Market value by year, 5 years forward, with [CAGR %] called out
- 2-3 supporting stats below, each with a named research source
- [% OF MARKET USING YOUR CATEGORY] · [NUMBER OF POTENTIAL CUSTOMERS]
- Never your own estimates here. Named research firms only.

SLIDE LAYOUT

WHY IT WORKS

Your credibility on every later slide borrows from how honest this one is.

Your TAM, Two Ways

Calculate TAM with two independent methods. Show they land in the same place.

FILL IN

- Top-down: [TOTAL MARKET VALUE] x [YOUR CATEGORY'S SHARE %] = [TAM]
- Bottom-up: [POTENTIAL CUSTOMERS] x [CONSERVATIVE REVENUE PER CUSTOMER] = [TAM]
- Label every assumption conservative, footnote every input's source
- End state: [TAM TODAY] growing to [TAM IN 5 YEARS] at [CAGR %]

SLIDE LAYOUT

WHY IT WORKS

Anyone can inflate one method. Two independent paths landing together is the credibility move.

Platform Overview

Your 5-7 core modules, each described by the job it does.

FILL IN

- [MODULE 1] — one line: the job it does for the customer
- [MODULE 2-6] — same pattern, jobs not features
- Frame left: 'end-to-end solution'
- Frame right: the customer outcomes it enables [REVENUE / SCALE / BRAND]

SLIDE LAYOUT

WHY IT WORKS

Jobs, not features. The buyer maps each module to revenue they can grow.

Integrations & Partnerships

Integrations are your distribution. Show the timeline and the mix.

FILL IN

- Timeline: [PLATFORM] + [YEAR ADDED], oldest to newest
- Revenue-mix pie by channel: [CHANNEL A %] / [CHANNEL B %] / [OTHER %]
- 3 checkmarks: why integrations compound growth
- Call out your deepest partnership [PARTNER STATUS / TIER]

SLIDE LAYOUT

WHY IT WORKS

Each integration is a moat AND a growth channel. Buyers price both.

The Supply Side

Whatever your version of supply is: partners, inventory, data, content.

FILL IN

- Breadth: [TOTAL SUPPLY COUNT] across [SOURCES]
- Depth: [EXCLUSIVE / PRIVATE COUNT] only available through you
- One advantages box per supply type [SPEED / QUALITY / PRICE / BRANDING]
- The exclusivity story: what can a customer get ONLY here?

SLIDE LAYOUT

WHY IT WORKS

Breadth proves scale. Exclusivity proves moat. Show both numbers separately.

Product Walkthrough

One slide PER core module. Repeat this exact pattern 5-8 times.

FILL IN

- Left: real product screenshot, current UI, no mockups
- Right: 3-6 checkmarks, each a job done for the customer
- Differentiated feature nobody else has? Give it a call-out box
- Close the sequence with one click-to-watch demo link slide

SLIDE LAYOUT

WHY IT WORKS

Buyers forward the demo link internally. Make the product sell itself before the meeting.

Roadmap & Brand Proof

Show you ship what you plan, and the market already trusts you.

FILL IN

- Roadmap: 4 quarters, 4-6 items each, shipped items checked
- Keep 1-2 ambitious items unlabeled to signal upside
- Brand proof: [REVIEW RATING + COUNT] · [PARTNER STATUS] · [AWARDS]
- Logos and badges only. No text. Social proof compresses diligence.

SLIDE LAYOUT

WHY IT WORKS

A roadmap with checkmarks is a promise-keeping record, not a wish list.

Scale Stats

8 big numbers proving the tech works at scale.

FILL IN

- [ACTIVE CUSTOMERS] · [PLATFORMS SUPPORTED]
- [TRANSACTION VOLUME PROCESSED] · [DATA POINTS MONITORED]
- [COUNTRIES SERVED] · [CATALOG / DATASET SIZE]
- [MONTHLY VISITS] · [UPTIME %]
- Big number 60pt+, small label under each. No sentences.

SLIDE LAYOUT

WHY IT WORKS

Engineering claims are cheap. Volume numbers are receipts.

Architecture Diagram

A simplified block diagram. Real engineering, safe level of detail.

FILL IN

- Blocks: [FRONTEND] · [APIs] · [DATABASES] · [WORKERS] · [QUEUES]
- Show the flow between blocks, label the stack generically
- Enough to prove a real engineering org built this
- NEVER: security-sensitive detail, exact service names, anything an attacker could map

SLIDE LAYOUT

WHY IT WORKS

The CTO on the buy side needs one look that says 'this scales'. That's the whole job.

Market Positioning

Competitors in point-solution buckets around you. You in the center, all-in-one.

FILL IN

- 3-4 buckets: [POINT SOLUTION A] · [POINT SOLUTION B] · [POINT SOLUTION C]
- You in the center as the only complete platform
- Moats box, 4 items: [UNIQUE TECH] · [BRAND] · [RELATIONSHIPS] · [BREADTH]
- Name real competitors. Vagueness reads as fear.

SLIDE LAYOUT

WHY IT WORKS

Fragmented market + one integrated player = the consolidation story buyers want to fund.

Feature Comparison Matrix

Rows of capabilities, columns of named competitors. Your column is full.

SLIDE LAYOUT

FILL IN

- 8-10 capability rows [THE JOBS THAT MATTER TO CUSTOMERS]
- Columns: you + 6-10 named competitors
- Your column: complete. Their columns: honest.
- Give competitors their real partial checkmarks. It reads more credible.

	▼		▼	▼		▼
	▼	▼	▼		▼	▼
	▼	▼		▼	▼	
	▼		▼	▼		▼
	▼	▼	▼		▼	▼
	▼	▼		▼	▼	
	▼		▼	▼		▼
	▼	▼	▼		▼	▼

WHY IT WORKS

An honest matrix survives diligence. An inflated one dies there and takes trust with it.

Marketing Strategy

Your funnel, every channel labeled. The frame that wins: low-touch.

FILL IN

- Channels: [INFLUENCERS / PARTNERS] · [EDUCATIONAL CONTENT] · [SEO] · [PPC] · [SOCIAL] · [WORD OF MOUTH]
- Drawn as a funnel, top of funnel to activation
- The frame: 'no-touch' or low-touch acquisition engine
- One line per channel on the role it plays

SLIDE LAYOUT

WHY IT WORKS

Buyers pay premiums for growth engines that don't depend on hiring a sales army.

Lead Generation Numbers

The funnel again, this time with real conversion math.

FILL IN

- [TOTAL SESSIONS] -> [NEW VISITORS] -> [SIGNUPS] -> [TRIALS] -> [ACTIVATIONS]
- [% CONVERSION] chip at every step
- Lead-mix pie: [ORGANIC %] / [PARTNERSHIP %] / [PAID %]
- The higher your organic share, the better this slide reads

SLIDE LAYOUT

WHY IT WORKS

A funnel with percentages says 'we know our machine'. That certainty is worth multiple turns.

#1 Channel Deep-Dive

One full slide on whatever channel drives most of your growth.

FILL IN

- Strategy overview: how the channel works for you, 4-5 bullets
- 4 stat chips: [ACTIVE PARTNERS] · [% OF SPEND] · [NEW TRIALS / QTR] · [REACH DRIVEN]
- The KPIs you track on this channel, listed
- Where the channel goes next [NEW AUDIENCES / GEOS]

SLIDE LAYOUT

WHY IT WORKS

Measuring one channel rigorously proves you can scale ANY channel with the buyer's money.

Example Customer Profiles

3-4 archetypes, anonymized or permissioned. Never leak real customer data.

FILL IN

- Per archetype: who they are, 2 lines
- What they use you for: 3 checkmark outcomes
- Tie each archetype to an addressable-population number from Section 2
- [ARCHETYPE 1: BEGINNER] · [ARCHETYPE 2: PRO] · [ARCHETYPE 3: ADJACENT]

SLIDE LAYOUT

WHY IT WORKS

Archetypes let the buyer multiply: 'this person x that population = the growth math'.

Unit Economics: The Deal-Makers

Three charts. If your numbers are good, this is what sells the company.

SLIDE LAYOUT

FILL IN

- CAC payback by monthly cohort: bar per cohort, [MEDIAN X.X MONTHS] called out
- Realized LTV / CAC by cohort age: line per quarterly cohort, [MEDIAN X.Xx]
- Revenue retention: [XX %] of last year's cohorts retained this year
- EVERY chart gets a commentary column: how the metric is calculated, in plain language

WHY IT WORKS

Consistency matters more than magnitude. 22 boring, similar cohorts beat 3 spectacular ones.

Growth Strategy Overview

6 labeled levers, 3-4 checkmarks each. The buyer's shopping list.

FILL IN

- [PRODUCT DEVELOPMENT] · [DEEPEN EXISTING CHANNELS]
- [NEW CUSTOMER SEGMENT] · [MARKETING EXPANSION]
- [CONVERSION + RETENTION] · [ADJACENT OFFERINGS]
- Each box: 3-4 concrete, named initiatives. No vibes.

SLIDE LAYOUT

LEVER 1	LEVER 2	LEVER 3
LEVER 4	LEVER 5	LEVER 6

WHY IT WORKS

This section is what the buyer's money buys. Write it as their plan, not yours.

One Slide Per Lever

Expand each of the 6 boxes into its own slide. Repeat this pattern.

FILL IN

- The lever, restated as an outcome [MORE OF WHAT, FOR WHOM]
- 3-5 named initiatives with what each unlocks
- What's already in motion vs what needs investment
- RULE: every lever must be something the BUYER'S resources accelerate

SLIDE LAYOUT

WHY IT WORKS

You're selling the map of what their money buys. Make every lever fundable.

Team & Organization

The company behind the product, at diligence-ready detail.

FILL IN

- [HEADCOUNT] across [N COUNTRIES], department split in a small table
- Geography pie + 3-4 bullets on how the org actually runs
- Org chart: boxes by function with headcounts
- No names below founder level

SLIDE LAYOUT

WHY IT WORKS

An org that runs on structure, not on the founder's memory, is an org that survives the founder leaving.

Systems & Corporate Details

Prove the business runs on systems. State the ownership cleanly.

FILL IN

- Business stack by category: [ERP] · [HRIS] · [INVOICING] · [COMMS] · [REPORTING]
- Legal structure: [ENTITY TYPE + JURISDICTION]
- Ownership summary at the level your process stage requires
- Early conversations: 'founder-owned, bootstrapped' is enough

SLIDE LAYOUT

WHY IT WORKS

Every tool named here is one less diligence question. Boring is the goal.

Financial Highlights

9 big numbers, no charts. The scoreboard.

FILL IN

- [REVENUE LAST YEAR] · [EBITDA LAST YEAR]
- [REVENUE THIS YEAR E] · [EBITDA THIS YEAR E]
- [GROSS MARGIN %] · [EBITDA MARGIN %]
- [CAC PAYBACK] · [LTV / CAC] · [RETENTION %]
- Big number, small label, footnote the methodology

SLIDE LAYOUT

WHY IT WORKS

By now every number here was already earned by an earlier slide. This is just the scoreboard.

Revenue Model & Recognition

Every stream as a column, plus the table that makes the buy-side CFO relax.

FILL IN

- Per stream: how it works, how it's priced, [% OF REVENUE]
- The upsell path: base plan to add-ons, drawn
- Rev-rec table: contract terms · pricing · cash collection · recognition timing
- [SUBSCRIPTION] · [ADD-ONS] · [USAGE / CREDITS] · [OTHER]

SLIDE LAYOUT

WHY IT WORKS

Clean revenue recognition removes the deal's scariest unknown: 'is the revenue real?'

Revenue & Cost Detail

The tables, with footnotes that answer questions before they're asked.

FILL IN

- Revenue by channel per year: actuals + 2 forecast years
- [% OF REVENUE] and [GROWTH RATE] rows under each channel
- Cost of revenue + operating expenses, same year columns
- Numbered footnotes on every strategic shift and unusual line

SLIDE LAYOUT

[1] [2] [3] FOOTNOTES = ANSWERS BEFORE QUESTIONS

WHY IT WORKS

A footnote you write is a diligence call you don't take.

Forecast & Balance Sheet

5 years out, with assumptions you can defend line by line.

FILL IN

- Revenue, gross profit, EBITDA + margins, 5 years forward
- 3 key forecast assumptions in plain sentences ABOVE the table
- Balance sheet snapshot: current assets + liabilities, last 3 year-ends
- Note clearly if figures are unaudited

SLIDE LAYOUT

3 KEY ASSUMPTIONS, PLAIN SENTENCES

'UNAUDITED'
IF TRUE

WHY IT WORKS

Conservative assumptions survive negotiation. Aggressive ones become the discount.

Hard rules for the social team

These may never appear in the published lead magnet, the promo content, or on camera:

- | | | | |
|---|--|---|---|
| 1 | The original PDF, any screenshot of it, or its visual design. Template only. | 2 | Any real AutoDS financial figure from the sale: revenue, EBITDA, margins, forecasts, costs, balance sheet, revenue mix. |
| 3 | Cohort economics values: LTV/CAC, CAC payback, retention, funnel conversions. | 4 | The cap table, ownership percentages, share counts, or tax structure. |
| 5 | The investment bank's name, any banker's name or contact details. | 6 | Internal org data: employee vs contractor split, org chart, salaries, tools stack. |
| 7 | Customer or store names from the deck, named suppliers, payment processor terms, platform revenue-share terms. | 8 | The real software architecture diagram or service names. |
| 9 | The internal headcount figure. Public team size is 250 employees. | | |

APPROVED WRAPPER FACTS: sold to Fiverr · the \$92M exit · bootstrapped · founder-owned · two co-founders · built from Lior's own eBay automation

Fill in your numbers.
Win the game.

Structure is transferable. The numbers are yours to earn.
