

BONUS Prompts Pack

10 ready-to-use prompts for the ABC-TOM AI team system

- 05 — Create New Agent
- 06 — Create New Skill
- 07 — Enable Auto Revision Loop
- 08 — Connect Api Keys
- 09 — Content Calendar
- 10 — Repurpose Content
- 11 — Analyze Competitor
- 12 — Create Hook Bank
- 13 — Weekly Review
- 14 — Close The Loop

Prompt: Create a New Agent

Use this to add a new agent to your team.

Copy and paste this into your chat (fill in your agent idea first):

```
I want to create a new agent for my team. Here's what I need:
```

```
---
```

```
Agent name: [e.g., "researcher", "editor", "social-media-manager"]
```

```
Main responsibility: [What should this agent do?]
```

```
When to use: [In what situations should this agent be activated?]
```

```
---
```

```
Please do the following:
```

1. First, study the existing agents to understand the structure and style:
 - Read A-agents/copywriter-agent.md
 - Read A-agents/gatekeeper-agent.md
 - Notice the format: frontmatter, core identity, required reading, checklists, output format
2. Read the brand core so the new agent knows the brand:
 - C-core/project-brief.md
 - C-core/voice-dna.md
 - C-core/icp-profile.md
3. Create the new agent file in A-agents/ folder:
 - Use the same structure as existing agents
 - Include frontmatter (name, description)
 - Define core identity and mission
 - Add "Required Reading" section pointing to relevant C-core and M-memory files
 - Create specific checklists for this agent's job
 - Define output format
 - Add collaboration instructions (who does this agent work with?)
 - Include a "The Loop" section explaining how this agent contributes to system learning
 - End with the signature: > **© Tom Even**
- > Workshops & future dates: www.getagents.today
- > Newsletter: www.agentsandme.com
4. Update M-memory/learning-log.md:
 - Add an entry documenting the new agent
 - Note its role and how it fits with the team
5. Update A-agents/gatekeeper-agent.md:
 - Add the new agent to the "Your Team" section if relevant
 - Define how Gatekeeper should review this agent's work (if applicable)
6. Consider if any workflows need updating:
 - Should this agent be part of an existing workflow?
 - Should we create a new workflow for this agent?

```
Show me the new agent file and confirm all updates are done.
```

Prompt: Create a New Skill

Use this to add a new skill to your agents' toolkit.

Copy and paste this into your chat (fill in your skill idea first):

```
I want to create a new skill for my agents. Here's what I need:
```

```
---
```

```
Skill name: [e.g., "newsletter-skill", "email-sequence-skill", "twitter-thread-skill"]
```

```
What it teaches: [What should agents learn from this skill?]
```

```
When to use: [In what situations should agents use this skill?]
```

```
---
```

```
Please do the following:
```

```
1. First, study the existing skills to understand the structure and style:
```

- Read T-tools/01-skills/social-post-skill/social-post-skill.md
- Read T-tools/01-skills/professional-email-skill/professional-email-skill.md
- Read T-tools/01-skills/research-briefing-skill/research-briefing-skill.md
- Notice the format: frontmatter, when to use, basics, structures, rules, templates, checklist

```
2. Read the brand core so the skill aligns with the brand:
```

- C-core/project-brief.md
- C-core/voice-dna.md
- C-core/icp-profile.md

```
3. Create a new folder in T-tools/01-skills/ with the skill name (e.g., T-tools/01-skills/newsletter-skill)
```

```
4. Create the skill file inside that folder (e.g., newsletter-skill.md):
```

- Use the same structure as existing skills
- Include frontmatter (name, description)
- Add "When to Use" section
- Explain the basics of this content type
- Provide proven structures and templates
- Include writing rules specific to this format
- Add quality checklist
- Include examples of good and bad practices
- End with the signature: > **© Tom Even**

```
> Workshops & future dates: [www.getagents.today](https://www.getagents.today)
```

```
> Newsletter: [www.agentsandme.com](https://www.agentsandme.com)
```

```
5. Update A-agents/copywriter-agent.md:
```

- Add the new skill to the list of skills the copywriter should read when relevant
- Add any specific instructions for using this skill

```
6. Update M-memory/learning-log.md:
```

- Add an entry documenting the new skill
- Note when agents should use it

```
7. Consider if we need a new workflow:
```

- Should we create a workflow file in T-tools/03-workflows/ for this content type?
- If yes, create it following the structure of social-post-workflow.md

```
Show me the new skill file and confirm all updates are done.
```

Prompt: Enable Automatic Revision Loop

Use this once to make the revision process automatic for all future posts.

Copy and paste this into your chat:

```
I want to update the workflow so that the Copywriter and Gatekeeper always iterate automatically

Please update the following files:

1. Update T-tools/03-workflows/social-post-workflow.md:
  - Add a new section called "Automatic Revision Loop"
  - Explain that after the first draft, if the Gatekeeper sends it back, the Copywriter must aut
  - The loop continues until approved or until 3 revision attempts (then escalate to human)
  - Only the final approved version should be presented to the human

2. Update A-agents/gatekeeper-agent.md:
  - Add instructions that when sending back, the Gatekeeper must immediately hand back to the Co
  - Add that this loop should happen automatically without waiting for human input

3. Update A-agents/copywriter-agent.md:
  - Add instructions to always check the Gatekeeper's feedback and revise automatically if not a
  - Add that the Copywriter should keep the version history (v1, v2, v3...)

4. Update M-memory/learning-log.md:
  - Document this new automatic revision process

From now on, when I ask for a LinkedIn post, I should only see the final approved version. The it

Confirm the updates are done.
```

Prompt: Connect API Keys & External Services

Use this to set up API keys and connect external services to your AI team.

Copy and paste this into your chat (fill in your service first):

```
I want to connect a new external service to my AI team. Here's what I need:

---
Service name: [e.g., "Google Gemini", "OpenAI DALL-E", "ElevenLabs", "Replicate"]
What it does: [e.g., "Generate images", "Text-to-speech", "Video generation"]
API key location: [Where did you get the key? e.g., "Google AI Studio", "OpenAI dashboard"]
---

Please help me:

1. First, explain what this service will allow my agents to do

2. Guide me through the setup process:
  - Where to add the API key in Claude Code settings
  - What MCP (Model Context Protocol) server I need to install (if any)
  - The exact commands to run in terminal

3. Create a test to verify the connection works

4. Update C-core/api-keys-registry.md:
  - Add an entry for this service
  - Document the service name, what it does, when it was connected
  - Note any usage limits or pricing info
  - Do NOT store the actual API key in this file (keep it in Claude Code settings only)

5. Update M-memory/learning-log.md:
  - Document what service was connected
  - Note the date and what capabilities it adds
  - Add any usage notes or limitations

6. If relevant, suggest which agents could use this new capability

Show me the step-by-step setup and confirm when it's working.
```

Common API Services You Might Want to Connect

Service	What It Does	Where to Get API Key
Google Gemini	Image generation, vision	Google AI Studio
OpenAI	DALL-E images, GPT models	OpenAI Platform
ElevenLabs	Text-to-speech, voice cloning	ElevenLabs
Replicate	Various AI models	Replicate
Stability AI	Stable Diffusion images	Stability AI

Service	What It Does	Where to Get API Key
Perplexity	Web search with AI	Perplexity API

Example: Connecting Google Gemini for Image Generation

I want to connect a new external service to my AI team. Here's what I need:

Service name: Google Gemini

What it does: Generate images from text prompts

API key location: Google AI Studio (<https://aistudio.google.com/>)

Please help me set this up...

Security Tips

- **Never share your API keys** in public channels or files
- **Set spending limits** on your API accounts
- **Monitor usage** regularly to avoid surprise charges
- **Rotate keys** if you suspect they've been exposed

After Connecting

Once connected, you can update your agents to use the new capability:

1. Add instructions to relevant agent files (e.g., update copywriter to request images)
2. Create a new skill file if the capability needs specific guidance
3. Document the workflow in M-memory for future reference

Prompt: Create a Content Calendar

Use this to plan your content for the upcoming weeks or month.

Copy and paste this into your chat (fill in your details first):

```
I want to create a content calendar. Here are my parameters:
```

```
---
```

```
Time period: [e.g., "Next 2 weeks", "January 2025", "Q1"]
```

```
Posting frequency: [e.g., "3x per week on LinkedIn", "Daily on Twitter", "2 LinkedIn + 1 newsletter"]
```

```
Main themes/topics I want to cover: [e.g., "AI productivity, personal branding, workshop promotion"]
```

```
Upcoming events/launches: [e.g., "Workshop on Feb 15", "Product launch March 1", "None"]
```

```
---
```

```
Please help me:
```

```
1. First, read my brand context:
```

- C-core/project-brief.md (what I do)
- C-core/voice-dna.md (how I sound)
- C-core/icp-profile.md (who I'm talking to)

```
2. Review my content pillars and themes to ensure variety
```

```
3. Create a content calendar with:
```

- Date and day of week
- Platform (LinkedIn, Twitter, Newsletter, etc.)
- Content type (educational, story, promotional, engagement)
- Topic/angle (specific enough to write from)
- Hook idea or opening line
- CTA (what action do I want readers to take?)

```
4. Format as a table I can easily reference
```

```
5. Balance the calendar:
```

- Mix of content types (not all promotional)
- Variety of topics within my pillars
- Strategic placement of promotional content
- Engagement posts for algorithm boost

```
6. Save the calendar to 0-output/ with a descriptive folder name
```

```
7. Update M-memory/learning-log.md with any insights about content planning
```

```
Show me the calendar and explain your strategic thinking behind the content mix.
```

When to Use This

- At the start of each month/quarter
- When you feel scattered about what to post
- Before a launch or event (to plan promotional content)
- When you want to batch-create content

Pro Tips

1. **Plan around events** — If you have a workshop, plan content that builds toward it
2. **Mix content types** — 60% value, 30% engagement/story, 10% promotional
3. **Leave flexibility** — Don't over-plan; leave room for timely content
4. **Batch creation** — Use the calendar to write multiple posts in one session

Prompt: Repurpose Content Across Platforms

Use this to turn one piece of content into multiple formats and platforms.

Copy and paste this into your chat (paste your original content):

I want to repurpose the following content into multiple formats:

ORIGINAL CONTENT:

[PASTE YOUR CONTENT HERE - can be a LinkedIn post, newsletter, podcast transcript, video script,

Original platform: [e.g., "LinkedIn post", "Newsletter", "Podcast episode"]

Please help me repurpose this into:

1. First, read my brand context:
 - C-core/voice-dna.md (to maintain consistent voice)
 - C-core/icp-profile.md (to adjust for different platforms)
2. Create adapted versions for these platforms (skip any that don't apply):

****LinkedIn Post:****

- Hook that stops the scroll
- Condensed version optimized for LinkedIn
- Engagement-focused CTA

****Twitter/X Thread:****

- Break into 5-10 tweet thread
- Each tweet should stand alone AND flow together
- Include a "save this thread" CTA

****Newsletter Section:****

- Expanded version with more depth
- Personal angle/story addition
- Clear takeaway or action item

****Short-form Video Script (Reels/TikTok/Shorts):****

- 30-60 second script
- Strong hook in first 3 seconds
- Visual/action suggestions

****Carousel/Slide Deck:****

- 6-10 slides
- One key point per slide
- Headline + supporting text format

3. For each version:
 - Adapt the tone for that platform's audience
 - Optimize length and format
 - Include platform-specific best practices
4. Save all versions to a new folder in 0-output/
5. Update M-memory/learning-log.md with insights about repurposing

Show me all the repurposed versions and highlight what you changed for each platform.

When to Use This

- After creating a piece of content you're proud of
- When you want to maximize reach from one idea
- When you have a newsletter/podcast and want social content

- When your best content deserves more exposure

Content Multiplication Matrix

Original Format	Can Become
LinkedIn Post	Twitter thread, Carousel, Short video
Newsletter	Multiple LinkedIn posts, Thread, Video series
Podcast Episode	Newsletter, Multiple posts, Quote graphics
Blog Post	LinkedIn series, Thread, Newsletter, Carousel
Video/Webinar	Clips, Posts, Newsletter, Transcript posts

Pro Tips

1. **Don't just copy-paste** — Each platform has different norms and audiences
2. **Lead with the best part** — Different platforms need different hooks
3. **Track performance** — Note which repurposed formats perform best
4. **Time your posts** — Space out repurposed content across days/weeks

Prompt: Analyze Competitor Content

Use this to study what's working for others in your space and extract learnings.

Copy and paste this into your chat (provide competitor details):

I want to analyze a competitor's content to learn what works. Here are the details:

Competitor name/handle: [e.g., "@competitor", "Company Name", "Creator Name"]

Platform to analyze: [e.g., "LinkedIn", "Twitter", "Newsletter", "YouTube"]

Their LinkedIn/Twitter URL or website: [paste URL if available]

What they do: [brief description of their business/niche]

Why I'm interested: [e.g., "They have great engagement", "Similar audience to mine", "I admire th

Please help me analyze their content:

1. First, read my brand context for comparison:

- C-core/project-brief.md
- C-core/voice-dna.md
- C-core/icp-profile.md

2. Content Analysis (based on their recent posts):

****Format Analysis:****

- What content formats do they use most?
- Average post length?
- How often do they post?
- Visual elements (images, carousels, videos)?

****Hook Analysis:****

- What types of hooks do they use?
- Pattern in their opening lines?
- What emotional triggers appear?

****Topic Analysis:****

- What themes do they cover repeatedly?
- What content pillars can you identify?
- What topics get most engagement?

****Engagement Patterns:****

- What posts get most likes/comments?
- What generates discussion vs. passive likes?
- How do they encourage engagement?

****Voice & Style:****

- How would you describe their voice?
- What makes them distinctive?
- Sentence structure patterns?

3. Create actionable insights:

- What can I learn from their approach?
- What could I do differently/better?
- What tactics could I test?
- What should I NOT copy (doesn't fit my brand)?

4. Generate 3-5 content ideas inspired by (but not copying) their best work

5. Save the analysis to B-brain/ as a competitor analysis file

6. Update M-memory/learning-log.md with key learnings

Show me the full analysis and highlight the most actionable insights.

When to Use This

- When starting out and need inspiration
 - When you notice someone getting great engagement
 - When researching your space
 - Monthly, to stay aware of trends
-

Ethics of Competitor Analysis

DO:

- Learn from patterns and strategies
- Get inspired by formats and structures
- Understand what resonates with shared audiences
- Adapt ideas to your unique voice

DON'T:

- Copy content directly
 - Steal unique concepts or frameworks
 - Pretend their ideas are yours
 - Obsess over competition (focus on your own path)
-

What to Look For

Element	Questions to Ask
Hooks	What makes me stop scrolling?
Structure	How do they organize information?
CTAs	What do they ask readers to do?
Frequency	How often do they post?
Engagement	What sparks comments vs. likes?
Uniqueness	What's their "thing" that stands out?

Prompt: Create a Hook Bank

Use this to build a collection of proven hooks you can use whenever you need inspiration.

Copy and paste this into your chat:

I want to create a personal hook bank – a collection of opening lines and hooks I can reference w

Please help me build this:

1. First, read my brand context:
 - C-core/project-brief.md (what I do)
 - C-core/voice-dna.md (how I sound)
 - C-core/icp-profile.md (who I'm talking to)
 - B-brain/content-samples/ (my actual content)
2. Analyze hooks from my existing content:
 - Extract the opening lines from my writing samples
 - Identify which patterns I naturally use
 - Note what works well in my voice
3. Create a Hook Bank organized by type:
 - Question Hooks:**
 - Open-ended questions that provoke thought
 - Rhetorical questions that challenge assumptions
 - "Have you ever..." pattern
 - Contrarian Hooks:**
 - Challenge conventional wisdom
 - "Unpopular opinion" format
 - "Everyone says X, but..."
 - Story Hooks:**
 - Personal experience openers
 - "Last week I..." format
 - Specific moment in time
 - Data/Number Hooks:**
 - Surprising statistics
 - Specific numbers that grab attention
 - "X% of people..." format
 - Bold Statement Hooks:**
 - Strong declarations
 - One-line truth bombs
 - Definitive statements
 - Curiosity Gap Hooks:**
 - Incomplete information that pulls readers in
 - "The one thing that..." format
 - Tease without revealing
4. For each hook type, provide:
 - 5 template structures I can fill in
 - 3 examples customized to my topics/niche
 - Tips for when to use this type
5. Create a quick-reference cheat sheet I can scan in 30 seconds
6. Save the Hook Bank to B-brain/hook-bank.md
7. Update M-memory/learning-log.md with insights about my hook patterns

Give me a comprehensive hook bank I can use every time I create content.

When to Use This

- Once, to create your initial hook bank
 - Quarterly, to refresh with new patterns
 - When you're stuck staring at a blank page
 - When your hooks feel stale or repetitive
-

Hook Type Quick Reference

Type	Best For	Energy Level
Question	Engagement, relatability	Medium
Contrarian	Attention, debate	High
Story	Connection, authenticity	Warm
Data/Number	Credibility, surprise	Analytical
Bold Statement	Authority, clarity	High
Curiosity Gap	Clicks, reads	Intriguing

Examples by Category

Question: "What would you do if you had an extra 2 hours every day?"

Contrarian: "Work-life balance is a myth. Here's what actually works:"

Story: "Last Tuesday at 3am, I made a decision that changed everything."

Data: "73% of professionals spend more time organizing work than doing it."

Bold: "Your content strategy is broken. Here's the fix."

Curiosity: "I discovered something about AI that most people get wrong."

Workshops & future dates: www.getagents.today

Newsletter: www.agentsandme.com

Prompt: Weekly Content Review

Use this at the end of each week to review performance, capture learnings, and plan ahead.

Copy and paste this into your chat:

It's time for my weekly content review. Please help me analyze and learn from this week.

Week of: [e.g., "January 20-26, 2025"]

Content I published this week: [list your posts/newsletters/content OR say "check 0-output/ for r

Any notable wins: [e.g., "Post went viral", "Got 50 new followers", "Great comments"]

Any challenges: [e.g., "Low engagement on Tuesday's post", "Ran out of ideas", "None"]

Please run my weekly review:

1. First, read context files:

- M-memory/learning-log.md (previous learnings)
- M-memory/feedback.md (audience feedback)
- C-core/project-brief.md (to assess alignment)

2. Content Performance Analysis:

- Review content created this week (check 0-output/ folders)
- What themes/topics did I cover?
- What formats did I use?
- What performed well (based on my notes)?
- What underperformed?

3. Pattern Recognition:

- What type of content resonated most?
- What hooks worked best?
- What posting times/days worked?
- Any audience feedback patterns?

4. Learnings to Capture:

- What should I do MORE of?
- What should I do LESS of?
- What should I EXPERIMENT with?
- Any new ideas that emerged?

5. Update Memory Files:

****M-memory/learning-log.md:****

- Add entry for this week
- Document what worked and what didn't
- Note any voice/style refinements

****M-memory/feedback.md:****

- Add any notable comments or DMs
- Document audience reactions

****M-memory/decisions.md:****

- Add any strategic decisions made this week

6. Next Week Prep:

- Suggest 3-5 content ideas based on what's working
- Flag any upcoming events/dates to create content around
- Recommend any experiments to try

7. Create a one-page weekly summary I can reference

Give me a comprehensive review with actionable insights for next week.

When to Use This

- Every Friday or Sunday
 - At the end of each content "sprint"
 - Before planning next month's content
 - When something performed unexpectedly (good or bad)
-

Weekly Review Checklist

Before running this prompt, gather:

- [] List of content published this week
 - [] Engagement metrics (likes, comments, shares, saves)
 - [] Any notable comments or DMs received
 - [] Follower count change
 - [] Any content that felt particularly good or bad to create
-

The Compound Effect

Weekly reviews seem small, but over time they:

- Build a knowledge base of what works FOR YOU
- Refine your voice through conscious iteration
- Prevent repeating the same mistakes
- Create momentum through documented progress

Month 1: You notice story posts get more comments **Month 2:** You refine your story-telling format
Month 3: Story posts become your signature **Month 6:** You're known for your stories

Sample Weekly Summary Format

```
## Week of [Date] – Content Review
```

```
### Wins ■
```

```
- [What worked well]
```

```
### Learnings ■
```

```
- [Key insight]
```

```
### Next Week Focus ■
```

```
- [Priority 1]
```

```
- [Priority 2]
```

```
### Experiments to Try ■
```

```
- [New thing to test]
```

© Tom Even

Workshops & future dates: www.getagents.today

Newsletter: www.agentsandme.com

Prompt: Close The Loop

Use this after completing a project to promote insights from Memory to Core. This is what makes the system compound.

Copy and paste this into your chat:

It's time to close The Loop. Please review my memory files and promote strong insights to the core.

Please do the following:

1. Read all memory files:
 - M-memory/learning-log.md
 - M-memory/feedback.md
 - M-memory/decisions.md
2. Read current core files:
 - C-core/project-brief.md
 - C-core/voice-dna.md
 - C-core/icp-profile.md
3. Identify what's ready to promote:
 - **From learning-log → voice-dna:****
 - Any voice pattern that worked 3+ times? Add it as a rule.
 - Any mistake that keeps repeating? Add it as a "never do this."
 - **From feedback → icp-profile:****
 - Any audience language that keeps appearing? Add it to how the ICP talks.
 - Any topic that consistently resonates? Note it in ICP interests.
 - **From decisions → project-brief or voice-dna:****
 - Any decision active for 3+ months? It's probably a core principle now.
 - Any brand positioning that's proven? Strengthen it in project-brief.
4. Sort B-brain/INBOX/:
 - Move any unsorted items to the right subfolder
 - Delete anything no longer relevant
 - Summarize what you sorted
5. Update the files:
 - Add promoted insights to the right C-core file
 - Mark promoted items in M-memory as "[Promoted to C-core]"
 - Clean up any outdated or contradicting entries in M-memory
6. Show me a summary:
 - What got promoted (and to which file)
 - What stayed in Memory (not ready yet)
 - What got cleaned up
 - What was sorted from INBOX

This is The Loop. It's what makes the system get smarter over time.

When to Use This

- After completing a major project
 - At the end of each week (pair with prompt 13)
 - When your output starts feeling stale
 - When Memory files are getting long
-

Why The Loop Matters

Most AI systems are static. You set them up and they stay the same forever.

The ABC-TOM Loop is different. Every project teaches you something. The Loop captures those lessons and bakes them into the system permanently.

Week 1: Memory is empty. Output is rough. **Week 4:** Memory has patterns. Output improves. **Week 8:** Strong patterns get promoted to Core. Output sounds like you. **Week 12:** The system runs itself. You just steer.

The Loop is the difference between "using AI" and "building an AI team."
